Extended forecast – As the disturbance begins to depart to the east through today, some stalling will occur and allow for a weak boundary to situate near the region into Fri. Some potential for iso. shower development is expected although the main activity will be southeast of the area. Conditions will dry out into the weekend with seasonably warm temperatures beginning to take hold. Winds will continue to vary throughout the next few days with a bit more enhanced S/SW winds gusting near 20mph late Sun as a system begins to develop off to the north of the area.
