WGC - HSBC CHAMPIONS

9AM Update

THURSDAY, NOVEMBER 5, 2009

Weather Synopsis

Clear skies will be around today and high temperatures will reach the low 20s. Winds will start from the southwest and then come a bit from the southeast late this afternoon. Expect a similar day tomorrow but high temperatures will reach into the mid 20s. On Saturday very muggy air will move into the area and low pressure will begin to develop to the west. A few showers may develop in the afternoon on Saturday but our best chance for showers comes on Sunday afternoon with the potential for a spotty thunderstorm.
