Lightning Threat

At 7 AM, high thin clouds were coverning the KL area but these will give way to sunshine by 8 AM. The air this morning is also a little cooler and drier due to light SE wind. With plenty of sunshine this morning I expect temperatures to climb quickly into the low 30s (low 90s) by early afternoon with isolated thunderstorms developing after 2 PM. Thunderstorms that develop today will move slowly from west to east this afternoon. Surface winds today will blow from the SE 5 - 10 MPH.
