THE CIMB CLASSIC

7 AM Update

SUNDAY, NOVEMBER 02, 2014

Weather Synopsis

At 7 AM, mainly cloudy skies, calm winds and warm and muggy conditions prevailed here at KLGCC. However, weather radar indicated an area of rain approximately 14 miles to our south, moving north at 10 MPH. I expect it to weaken as it moves our way but there is a slight chance for rain here between 8 and 0830. Partly sunny, hot and humid conditions will be on the way again for us today with early afternoon thunderstorms likely. Storm cells today will move from SSW to NNE at 10 to 15 MPH. Heavy downpours of rain and intense cloud to ground lightning are likely with these afternoon storms.

Weather Forecast

Lightning Threat

9AM: Variable clouds with a chance for scattered showers. TEMP: 80°F / 27°C WINDS: NE 3 - 6 MPH / 5 - 10 KPH	LOW
NOON: Partly cloudy, hot and humid with isolated showers and thunderstorms developing. TEMP: 86°F / 30°C WINDS: SSE 8 - 12 MPH / 13 - 19 KPH	HIGH
