## 7:30AM Weather Update: Sun, Mar. 15, 2015

**Synopsis:** A weak frontal boundary is just north of Central Florida this morning and is producing some low cloudiness across the area. This boundary will slowly sag south into Southern Florida this afternoon and will combine with the sea breeze, to kick off some isolated showers across inland sections. Otherwise, partly cloudy skies can be expected along coastal sections today with highs in the low 80's. Drier/less humid air will overspread the region late today as high pressure builds south. Mostly sunny and less humid conditions will make for a nice day on Monday.

### Today:

9AM:  Mostly cloudy, warm and humid.  
Temp: 69F RH: 87%  
Winds: WNW 4-8 mph

Noon:  Partly cloudy.  
Temp: 76F RH: 73%
