**Today:** – Partly cloudy skies can be expected today with highs in the mid to upper 80's. Can't rule out an isolated shower or thunderstorm developing this afternoon, but the best chances will be to the north and west of Atlanta. Chances for scattered showers and t-storms will increase late tonight as a weak front sags southward into the area.

**Extended forecast** – A cold front will sag southward into Georgia on Monday increasing the chances for showers and t-storms. The front will lift back to the north on Tuesday. But a moist and unstable atmosphere will linger across the region. This will likely aid in the development of scattered afternoon showers and thunderstorms.

Forecast prepared by DTN meteorologist Stewart Williams.
