Winds (mph)	Light N	N 5-10	NNE 6-12	Light	NW 6-12

Extended forecast – High pressure will be the dominating weather feature for the next several days over much of the state. Winds will shift to the south by Monday, gradually increasing the humidity levels over the Houston metro next week. Temperatures will approach the upper 80s and perhaps reach 90 a few days during the early part of the week. The next chance for rain will hold off until sometime next weekend.

Forecast prepared by on-site meteorologist Willis Young.
