Today – Isolated showers this morning are expected to increase in coverage this afternoon. A brief heavy downpour or two will become possible late this morning and through the afternoon. An isolated thunderstorm cannot be ruled out, though the risk will stay at 10% during the daylight hours, with chances increasing after play this evening. Breezy east-northeasterly winds will gust up to 20 mph.

Rainfall through 6pm: 0.10" – 0.20"

Rainfall 6pm Thursday – 6am Friday: 0.10 – 0.20", locally higher in any thunderstorms.

Sunrise: 7:09am / Sunset: 5:31pm

Winds (mph)	SE → S 6-12	S → SW 7-13	SW → W 9-18	N/NE 4-8

Extended forecast – Scattered showers and isolated thunderstorms are possible tonight into early Friday morning before rain chances become increasingly isolated Friday afternoon as a frontal boundary lifts well north of the area. Another round of scattered showers and isolated thunderstorms are expected during the morning hours on Saturday as a boundary pushes across the area. Briefly heavy downpours will be possible. Dry conditions are forecast throughout the day on Sunday as a drier air mass settles into the region.
