Sky						
Weather	Mostly sunny	Mostly sunny	Partly cloudy isolated storms	Partly cloudy isolated storms	Partly cloudy	Mostly sunny
Rain Probability	0%	0%	20%	20%	10%	10%
Lightning Probability	0%	0%	20%	20%	10%	10%
Temp (F)	79	85	88	91	92	89
Winds (mph)	Light	S 5-10	S 5-10	S 5-10	SSW 5-10	SW 5-10

Today – A mixture of sunshine and clouds will prevail today, with temperatures warming to the lower 90s. Heat index values may reach 100 degrees for a few hours this afternoon. A weak frontal boundary lying just north of the Quad Cities will interact with a very moist atmosphere to produce isolated showers or storms today. I believe much, if not all this activity will form to our north today.

Sunrise: 5:39am
Sunset: 8:34pm

Day	Tonight	Mon AM	Mon PM
Sky			
Weather	Partly cloudy	Mostly sunny	Mostly sunny
Rain Probability	0%	0%	0%
Rain Amount (in)	0.00"	0.00"	0.00"
Temp (min/max)	74	75 → 85	91
Winds (mph)	Light S	S 5-10	SSW 8-15

Extended forecast – A dome of heat and humidity will build over much of the Midwest this next week, with high temperatures warming to the lower to middle 90s, and overnight lows only dropping to the middle 70s. The next chance for rain will hold off until mid-week.

Forecast prepared by on-site meteorologist Willis Young.
