Today – Scattered showers are moving across northern Illinois this morning with some of these likely to affect the course. Highest rain chances will be before 9am with most of the afternoon hours favoring dry conditions. Spotty showers could return to the area by this evening. East to northeast winds will be in place with a few gusts over 15 mph. Temperatures should reach the upper 60s this afternoon. Rainfall from last 24 hours: 0.28". Rainfall today: Less than 0.10". **Sunrise: 6:28am / Sunset: 7:06pm**

Extended Forecast – An upper level low will begin to approach the area late tonight into tomorrow. Some shower activity could develop tonight, otherwise the main threat will be between 9am-3pm Saturday. Rainfall could be heavy, however the threat for lightning is low. Localized rainfall amounts may approach 1.00" in some areas. A few showers could linger into Sunday morning as the main upper level energy pass through, otherwise much needed drier conditions will filter across the area.
