Time	7am	9am	11am	1pm	3pm	5pm
Sky						
Weather	Mostly sunny	Partly cloudy	Mix of sun and clouds	Isolated shower	Shower possible	Isolated shower
Rain Probability	0%	0%	10%	25%	30%	25%
Lightning Probability	0%	0%	0%	0%	0%	0%
Temp (F)	70	79	86	89	90	86
Winds (mph)	Light and variable	Light and variable	Variable 5-10	SE 5-10	N/NW 5-12	N/NW 5-12

**Today** – Pop-up showers will become possible this afternoon, with the highest chances expected from 2-4pm. Any showers that occur may produce moderate to briefly heavy rainfall intensities. Erratic winds are forecast for this afternoon, with variable wind directions anticipated. A northerly wind gust to 15-20 mph may become possible this afternoon, but any such gust would be quite infrequent.

**Sunrise: 6:39am / Sunset: 6:23pm Rainfall: 0.10" or less.**

Day	Fri AM	Fri PM	Sat AM	Sat PM	Sun
Sky					
Weather	Isolated shower after 11am	Scattered showers	Scattered showers	Showers likely; isolated T-storms	Scattered showers

Gusts (mph)	G15 late AM	G15-20	G15 late AM	G17-22	G24-28

**Extended forecast** – Northerly winds will attempt to become more established on Friday and Saturday afternoon, but the strongest and most consistent wind gusts are predicted to arrive on Sunday. Scattered showers are expected Friday afternoon as moisture values rise ahead of a disturbance set to move through on Saturday. Showers will become likely on Saturday afternoon as a disturbance drifts westward through Panama. An isolated thunderstorm is additionally possible Saturday afternoon. Showers chances will continue on Sunday, but the coverage and intensity of this activity is expected to be reduced as drier air builds in and northerly winds increase.
