Winds (mph)	NE 10-15 AM	NE 5-10	NE→SW 10-15	SW→NW 10-20

Extended forecast – High pressure will build over the region Friday and dominate the weather through the weekend. This will provide a gradual warming trend with highs returning to the mid 70s this weekend under sunny skies. Saturday morning lows could just get cold enough to allow patchy frost to form around daybreak. Otherwise, the next piece of upper level energy will arrive on Monday bringing a chance for showers and much cooler temperatures with highs in the upper 50s.

Forecast prepared by meteorologist Stewart Williams.
