6am Weather Forecast

Thursday May 13, 2021

| Time | 8am | 10am | 12pm | 2pm | 4pm | 6pm |
|-----------------------|-------------|---------------|--------------|---------------|---------------|---------------|
| Sky | | | | | | |
| Weather | Cloudy | Mostly Cloudy | Partly Sunny | Partly Cloudy | Partly Cloudy | Partly Cloudy |
| Rain Probability | 0% | 0% | 0% | 0% | 0% | 0% |
| Lightning Probability | 0% | 0% | 0% | 0% | 0% | 0% |
| Temp (F) | 57 | 62 | 67 | 71 | 73 | 72 |
| Winds (mph) | N/NE 3-6 | NE 4-8 | NE 5-10 | NE 5-10 | NE 5-10 | E/NE 5-10 |

Today – Cloud cover remains thick over north Texas but will slowly erode during the day with some much needed sun expected by this afternoon. With less cloud cover temperatures should reach the lower 70s, however this is still several degrees below normal. Light northeast winds will be in place throughout the day with speeds generally under 10 mph. **Sunrise: 6:28am / Sunset: 8:18pm**

| Time | Tonight | Fri | Sat | Sun | Mon |

Extended Forecast – Dry conditions will continue into Friday with partly cloudy skies and temperatures climbing into the upper 70s. More substantial southerly flow returns this weekend, bringing an increasingly humid and unstable airmass into the area. The potential for T-storms will also increase, especially late Saturday night into Sunday morning as a weak disturbance moves overhead. Rain/T-storm chances may have to be raised eventually, however given the subtle nature of this disturbance, confidence in precipitation coverage remains low. Active weather likely persists through early next week.

Forecast prepared by meteorologist Kyle Koval.
