Today – Another day of hot and humid conditions with temperatures climbing into the lower 90s. Shower/T-storm development will again favor the higher terrain 50 miles west of the course, however there is a low chance this activity pushes towards Baltimore after 3-4pm. Winds will be out of the south throughout the day and should hold at, or below, 10 mph. **Peak Heat Index: 96-100F**
Sunrise: 6:29am / Sunset: 7:47pm

Winds (mph)	Becoming Light	S 5-10	NE → E 5-10	S/SE 5-10	S/SW 6-12

Extended Forecast – The highest threat for showers/T-storms this week is expected to develop Friday afternoon into Friday night as a weak disturbance moves through the region. The biggest uncertainty revolves around timing of the highest rainfall chances, with individual model guidance varying by 3-6 hours. Another round of showers/T-storms are possible on Saturday as a weak front drops into the area, but the finer details will be dependent on how the Friday afternoon/night activity evolves. Total rainfall Friday/Saturday could exceed 1 inch. Some drier air works into the region on Sunday and likely limits shower/T-storm significantly.

Forecast prepared by meteorologist Kyle Koval.
