## 7 AM Weather Update

Thursday, April 8, 2021

**Synopsis:** High clouds will begin to stream over the area this morning making for partly cloudy skies. Showers and thunderstorms across Alabama will be hitting drier air and weakening as they move to the east today. This will provide a 20% chance for an isolated shower between 5-10 pm this evening, if the precipitation holds together. Otherwise, expect highs in the lower 80's today and south-southwest winds increasing to 10-15 gusting to 20 mph during the afternoon. A warm front lifts into the area on Friday, bringing increasing chances for scattered showers and thunderstorms during the afternoon and evening hours. A lull in the precipitation is expected for most of the day Saturday before a line of rain and thunderstorms moves through the Augusta area late afternoon into the evening hours. The actual cold front will not move through the region until Sunday, keeping chances of showers and isolated thunderstorms in the forecast through early afternoon before clearing.

### Today:

9 AM: Partly cloudy.

Temp: 64F

RH: 60%

Winds: S 4-8

3 PM: Mostly cloudy and breezy.

Temp: 82F

RH: 25%
