**Today** – Partly cloudy and breezy conditions can be expected again today as high pressure remains to the north producing the northeasterly wind flow. Isolated showers cannot be ruled out at any time today, but most locations will remain dry. Scattered showers will become more likely later tonight through the early morning hours of Sunday as the next coastal trough moves on-shore.

**Sunrise: 658am / Sunset: 524pm**

**Extended Forecast** – Lingering showers will be possible Sunday morning. Otherwise partly cloudy skies can be expected with highs in the 70s. Northeasterly winds of 10-15 mph will continue as high pressure remains to the north. A dry cold front will move through the area on Monday dropping the temperatures for Tuesday with highs in the upper 60s to around 70 degrees.

Forecast prepared by meteorologist Stewart Williams.
