Winds (mph/kmh)	S/SW 4-8 8-16 kmh	S/SW 6-12 10-20 kmh	SW 7-14 G18 14-32 kmh	W/SW 10-15 G20 16-32 kmh	W 12-18 G25 20-40 kmh	W 10-15 G22 16-34 kmh

**Today** – Another wave of thicker wildfire smoke will affect the Calgary area this morning. This smoke should dissipate to a degree during the afternoon with a hazy mix of sun and clouds expected. Temperatures will again climb towards 90F/32C but will likely fall short of the current record high of 94F/34.4C. Southwest to west winds will slowly strengthen as the day progresses with gusts around 20 mph/30 kmh becoming possible after 2pm. The strongest gusts today should hold off until after the round ends. **Sunrise: 6:22am / Sunset: 8:57pm**

**Tomorrow** – A strong cold front will sink southward through Alberta during the day Monday, likely reaching Calgary towards the late afternoon or early evening hours. Increased cloud cover will lead to cooler temperatures with gradually improving air quality as upper-level winds start to push the wildfire smoke out of the area. Rain showers will begin to develop after 4-5pm with a steady, soaking rain expected Monday night. Wind gusts of 20-25 mph/30-40 kmh will be possible, especially during the afternoon/evening. Rainfall Monday night: 0.25-0.50 in/6-12 mm. **Sunrise: 6:23am / Sunset: 8:55pm**

Forecast prepared by meteorologist Kyle Koval.
