Winds (mph)	SW → W/NW 10-20 G25	W/NW → N 10-20 G25	N/NE 10-15 G20	N/NE → N 12-17 G22	N/NE → E/NE 7-13 G16

Extended forecast – A cold front is likely to move through dry during the mid-morning hours Friday, but an isolated shower or thunderstorm cannot be ruled out after 3pm Friday afternoon due to the boundary stalling out to our southeast. Rain will become likely after 8pm Friday with scattered thunderstorms additionally possible as a trough approaches from the west and causes lift along and northwest of the stalled out frontal boundary. Rainfall of 0.25" – 0.50" is anticipated Friday night. Showers and perhaps an isolated thunderstorm chance will continue Saturday morning. Showers will become isolated in coverage for Saturday afternoon. An additional 0.15" – 0.30" of rainfall is expected Saturday. Cool and dry conditions are forecast for Sunday's final round.
