Temp (F)	60	69	75	78	76	71
Winds (mph)	NNE 2-4	NE 5-10	NE 6-12 G15	NE 7-14 G20	NE 6-12 G15	NE 5-10

Today – Clear skies are expected the remainder of the morning into the early afternoon. There is a very slight chance of a brief light shower moving onshore from the Atlantic Ocean later this afternoon into this evening, but no measurable rainfall is expected. Northeast winds may occasionally reach 15-20 mph this afternoon and high temperatures will reach the mid-upper 70s.

Rainfall: Trace, if any

Sunrise: 7:43am / Sunset: 6:32pm

Winds (mph)	SE 7-14 G15-20	E 6-12 G15	ENE 7-14 G15-20

Extended forecast – Intermittent light showers are possible at times throughout the day Saturday into Sunday afternoon but will be more of the isolated, hit-or-miss variety with little measurable rainfall anticipated. Areas of localized patchy fog can't be ruled out across coastal Georgia Saturday and Sunday mornings. High temperatures reach the upper 70s to low 80s through Monday with easterly winds occasionally reaching 15-20 mph during the late afternoon/early evenings; the highest chances for the upper threshold of winds will be across exposed eastern areas of the Marshwood and Magnolia courses.

Forecast prepared by meteorologist Cody Fishman.
