Today – The north-northwesterly breeze this morning will become weaker and inconsistent from mid-morning through the early afternoon – allowing for the Pacific seabreeze to drift nearby or overhead. This feature may generate an isolated coverage of showers around midday/early afternoon before more consistent northerly winds return closer to 2-3pm and push this boundary back towards the Gulf of Panama. Wind gusts of 15-20 mph will become possible after 2-3pm.

Extended forecast – Breezy north-northwesterly winds are expected to return late Saturday morning, with gusts of 20-25 mph forecast to occur in the afternoon. Lighter winds are forecast Sunday morning, potentially allowing for an isolated light shower to develop around midday. Expect a more consistent northerly breeze to return after 2-3pm, with a few gusts of 15-20 mph becoming possible.
