Tomorrow – A weak frontal boundary and area of low pressure approaches from the north and looks to move into the area during the early afternoon hours. Expect that rain/storm chances will remain low during the morning as a complex of thunderstorms looks to hold across eastern portions of Oklahoma. A few showers and thunderstorms may start to pop up around 3pm as the frontal boundary sags towards the metroplex. Any individual pop-up shower or storm in the afternoon would likely only last for 30-45 minutes before dissipating. The temperature will reach a high near 83°F.

Forecast rainfall: Less than 0.10"
