Winds (kph)	13-21	16-24	16-24 G32	19-27 G35	19-27 G35	8-16

Today – Sunny becoming a mix of sun and clouds this afternoon. There will be a 10-20% chance of a stray pop-up shower this afternoon, otherwise anticipate dry conditions throughout the day. The temperature will reach a high near 74°F/23°C. West-northwesterly winds will increase to 12-17 mph (19-27 kph) in the afternoon, with gusts in the 18-23 mph (29-37 kph) range. A few showers and isolated thunderstorms are possible after 10pm with chances continuing overnight, but any rainfall is likely to hold below 0.10" (2.5mm). **Sunrise: 5:36am / Sunset: 8:59pm**

Winds (kph)	8-16	11-19 G24	10-20	11-24	10-20

Extended forecast – An isolated shower will be possible Saturday morning, with scattered showers and a 30-40% chance of thunderstorms after 1pm. Rain will become likely towards daybreak Sunday due to an upper level low situated over the Upper Great Lakes. An impulse of upper level energy out ahead of this system and cold air aloft will enable a scattered coverage (40-50% lightning probability) of embedded thunderstorms to develop within the areas of rain after 10am Sunday. Rain and thunderstorm activity is forecast to wane after 4-5pm Sunday as the upper level impulse moves east of the area. Confidence remains medium in the timing of Sunday's precipitation.

Forecast prepared by meteorologist Joe Halvorson.
