

## FRIDAY, JUNE 17, 2022 - 5 AM WEATHER FORECAST

A narrow escape from rain showers last night is taunting us in the form of thick early morning cloud cover, which is anticipated to burn off later this morning. Once the sun peeks out, temperatures accelerate towards the mid 80s and southwesterly winds kick in with gusts near and above 18 mph. The atmosphere is expected to behave until 12:30 PM, but a quickly approaching boundary from the west is likely to initiate shower or storm activity in the 12:30 - 3:30 PM time frame. Once this boundary passes, winds shift to the west and dry us out quickly for the remainder of the day. This will keep skies relatively clear and temperatures in the low to mid 80s until sunset, when temps fall towards 60 degrees overnight. Saturday stays dry, but we struggle to see 70 degrees as cool northwest winds blowing up to 20 mph remain consistent. The rest of the weekend's weather is dictated by a nearly stationary low pressure system to our east, keeping us entrenched on the back end of unusually cold air for this time of year with some light showers or sprinkles possible late Saturday into early Sunday.
