Today – Any areas of ground fog will quickly erode after sunrise with mostly sunny skies expected the rest of the morning. Skies should become partly cloudy this afternoon with the main threat for precipitation remaining well east of the course. Winds will gradually increase and eventually become gusty out of the southwest this afternoon. A high in the lower 80s is expected.

Sunrise: 7:37am / Sunset: 7:41pm

Extended forecast – Fog is expected to form over the Gulf of Mexico tonight with some of this potentially moving onshore. Confidence in dense fog is low. A cold front will approach from the north on Saturday and is expected to push through central Florida Saturday night into Sunday morning. A few showers will be possible along the front with this activity coming to an end by 10am Sunday. The threat for lightning Saturday night is low but can't be ruled out.

Forecast prepared by meteorologist Kyle Koval.
