Winds (mph)	Light & Variable	Light & Variable	Var-SW 4-8 mph	Var-SW 5-10 mph	Variable 5-10 mph	N-NNE 6-12 G20

Today – Thunderstorm activity early this morning is expected to end around 6:30am-6:40am. After a mostly dry afternoon, thunderstorm chances increase again after 7-8pm. Thunderstorms that occur this evening could be strong-severe with heavy rain, frequent lightning, damaging wind gusts, and even an isolated tornado possible. High temperatures are expected to reach the low 90s this afternoon.

Rainfall: Around 0.10" in the morning, 0.25-0.50" with locally higher amounts to 0.50-1.00" after 6-7pm

Sunrise: 5:40pm / Sunset: 8:16pm

Day	Sat AM	Sat PM	Sun AM	Sun PM

Temp (min/max)	68	80	64	81
Winds (mph)	N 5-10 mph	NNE-NE 6-12 G20	Light & Variable	NNE-NE 5-10 G15

Extended forecast – There may be a few lingering showers leftover on Saturday morning, but drier conditions are expected to build through the day. Winds may be the highest of the week on Saturday, mainly out of the northeast sustained 6-12 mph with occasional gusts up to 20 mph possible. Can't rule out an isolated shower or two on Sunday, but dry periods are expected than wet. Winds will again be primarily out of the northeast on Sunday, but slightly lessened at sustained values near 5-10 mph with a few gusts to 15 mph possible. Temperatures return to more seasonal values in the low 80s Sat and Sun.
