Winds (mph)	E/SE 6-12 G18	SE 6-12 G18	S/SE 6-12 G18	S/SE 6-12	Variable 5-10	NW 8-14

Today – A cold front will slowly move through Nebraska with showers/T-storms possible much of the day. The greatest threat (50-70% chance) for showers/T-storms will exist this morning. While chances lower during the afternoon hours, the front likely doesn't clear the Omaha area until 5-7pm. Background winds favor a southerly direction until the front arrives, however T-storm outflow could make winds erratic and gusty at times. Forecast rainfall: 0.25-0.50" with locally higher amounts. **Sunrise: 6:31am / Sunset: 8:27pm**

Winds (mph)	NW 10-16 G26	NW 14-20 G32	NW 16-22 G34	N/NW 16-22 G34	N/NW 14-20 G32	N/NW 10-16 G28

Tomorrow – As low pressure departs to the east, strong northwest winds will develop for Monday. Gusts of 30-35 mph will be possible much of the day. Some light shower activity can't be ruled, especially during the morning. Otherwise, clouds will slowly erode as the day progresses. Temperatures will only reach the middle 70s during the afternoon. **Sunrise: 6:32am / Sunset: 8:25pm**
