Today – Showers will spread across Nashville this morning. There will be some limiting factors for lightning, so chances will be capped at 40%. Heavy downpours are the bigger concern given slow movement. While showers/T-storms could redevelop later this afternoon, the morning cloud cover and precipitation should keep coverage limited. Forecast rainfall: 0.25-0.50" with localized amounts up to 1.00". **Sunrise: 6:30am / Sunset: 6:52pm**

Tomorrow – Most of the day will feature dry conditions with partly cloudy skies. With that said, a lingering upper-level disturbance could kick off isolated (15-25% chance) shower/T-storm development between 1-5pm. Northwest winds can be expected throughout the day with gusts over 15 mph possible during the afternoon. Forecast rainfall: Less than 0.10". **Sunrise: 6:30am / Sunset: 6:51pm**
