Temp (F)	74	77	79	80	79	75
Winds (mph)	S/SW 10-15 G20	S/SW 10-15 G20	S/SW 10-15 G20	SW 9-14 G18	W/SW 8-13 G15	W 8-13 G15

Today – Dry conditions are forecast through the early afternoon under mostly sunny to partly cloudy skies. A weakening cold front currently working across the Florida Peninsula may generate a thin band of showers and potentially a few embedded thunderstorms some 40+ miles to the northwest of the Abaco Club from 3-6pm. Any shower activity out ahead of this boundary will be isolated across Central Abaco this afternoon. This weak cold front is forecast to move across Great Abaco this evening, with a thin band of scattered showers expected to move through between 7-10pm. Breezy south-southwesterly winds will gradually turn west-southwesterly late in the day out ahead of the weak cold front.

Forecast rainfall through 6pm: Less than 0.10". Sunrise: 6:56am / Sunset: 5:44pm

Day	Tonight	Tuesday	Wednesday
Sky		 	
Weather	Scattered showers From 7-10pm; breezy	Isolated showers after 2pm; breezy	AM showers possible becoming isolated in PM; breezy
Rain Probability	50%	20%	40% → 20%
Rain Amount (in)	0.10" – 0.20"	< 0.05"	0.05" – 0.15"
Temp (min/max)	Low: 68°F	68/75	68/79
Winds (mph)	W/NW → NE 13-18 G22	NE → E/NE 13-18 G22	S/SE 13-18 G22

Extended forecast – There will be an isolated chance for a passing ocean shower Tuesday afternoon as breezy northeasterly winds turn east-northeasterly. A round of intermittent showers are possible Wednesday morning as a pocket of moisture rotates through the northwestern Bahamas, with activity likely to become isolated by early Wednesday afternoon. A cold front will arrive late Thursday, bringing scattered showers and isolated thunderstorm potential Thursday evening into early Friday.
