Today – A broken and weakening line of showers along a frontal boundary will move into the area between 8:00-8:30am. A moderate to briefly heavy shower or two may then pass over the course through 9:00-9:30am before this boundary stalls near or just south of the area. Anticipate a lull or isolated coverage of showers thereafter through the early afternoon. Additional scattered showers redevelop after 2-3pm, with heavy downpours and a 10-20% probability of lightning within the strongest cells that develop. Light north-northwesterly winds will turn westerly for much of the afternoon, before switching to the north-northeast late in the day as the Atlantic sea breeze pushes inland. High temperature: 87°F. **Forecast rainfall: 0.15" – 0.30", locally higher in isolated T-storms.** **Sunrise: 6:47am / Sunset: 6:29pm**
