**Today – Heat Advisory 12pm-8pm!** Hot and humid conditions can be expected today with highs in the low 90s. Combine that with the humidity and the heat index will make it feel more like 105F-108F this afternoon. Cannot rule out an isolated thunderstorm developing during the afternoon. Otherwise, the fog will burn-off quickly with mostly cloudy skies becoming partly cloudy during the afternoon.

**Extended forecast** – Hot and humid conditions will continue through the weekend with highs in the low 90s. The heat index will make it feel more like 105-108F during the afternoon hours. There will be a chance for scattered thunderstorms Saturday morning as a complex of storms moves into Northern Tennessee and weakens as it moves south into the Memphis area. Another complex of storms will move across Northern Tennessee on Sunday that may dip far enough south to bring a chance of storms to the Memphis area. Currently the bulk of this activity will remain to our north with dry conditions expected.
