

Scottish Open Forecast

6 AM Update

Saturday, 15 July 2023

Synopsis -

This morning, we will begin the day with partly sunny skies with showers developing to the SW already this morning. Today, a strong low pressure system will sit just west of Edinburgh throughout the day giving us a good chance for showers and thunderstorms. Scattered showers and thunderstorms are likely to develop after 10 AM and the threat will linger into late afternoon before diminishing during early evening. Any thunderstorms that do develop tomorrow will produce heavy rains, gusty winds, and even some small hail. Strong winds remain forecasted for Sunday with speeds in the 20-30 MPH range and gusting to over 40 MPH. The timing of the strongest winds will be between 7 AM and 4 PM on Sunday.
