

### SATURDAY, JUNE 17, 2023 – 5 AM WEATHER FORECAST

The fog machine is working hard up on the Hollywood hills and if it was going to sink down to us, it should do so through 6:30 AM before conditions improve by 8 AM. Overcast skies once again at 8 AM are forecast to quickly burn off since the marine layer is low and shallow today allowing for mostly sunny skies to be likely before 11 AM. With light winds and full sunshine later on this morning, temps will jump quickly through the 60s and 70s trying to get close to 80 degrees by lunchtime. That is when the drama and mystery begin in the forecast for this afternoon as the best computer models show a very strange area of low clouds and haze to linger along the beaches from Santa Monica down through LAX. Occasionally this area of clouds or haze may get pushed onshore towards LACC and just to our south. This could interrupt our mostly sunny afternoon with some intermittent clouds/haze. Combine that with southwest winds gusting in the teens at times and that should cool our temps back down into the 60s before we finish play. Sunday's forecast is a bit more straightforward with morning clouds, afternoon sun and highs in the mid 70s.
