

**SUNDAY, JUNE 18, 2023 – 5 AM WEATHER FORECAST**

Happy Father's Day everyone! The marine layer that foiled the plot for a good sunset last night filled in all around Los Angeles overnight with some patchy fog and mist in parts of the area. We aren't completely out of the woods yet with that risk of rogue fog/mist running another couple of hours, then as we get later in the morning hours the satellite image should reflect the sun burning off the edges of the low cloudiness. We'll transition from cloudy and hazy conditions over to periods of sunshine towards lunchtime into this afternoon as the latest models want to keep the clouds along the beaches most of the day with hazy cotton balls crossing the 405 at times and interrupting our sunshine afternoon. There is even the chance that we could see more clouds than sun this afternoon, but we'll hope that like most Hollywood storylines, the good guy will just barely win. Temps will be in the 60s a good portion of the day with a brief bump to around or above 70 degrees midday. Light winds this morning from the south and east will become that familiar southwest breeze this afternoon generally at 5-10 mph with a few gusts around 15 mph.
