

THURSDAY, JUNE 15, 2023 – 5 AM WEATHER FORECAST

Another day, another cloudy start at LACC, but this time with no fog, just some haze and a couple patches of mist. There are even some thinner portions of the cloud cover overhead, so we may even see some brightening of the skies at times as we work our way through this morning. All the models have this marine layer cloud cover burning back towards the coast as the afternoon progresses. While this ideally would give us more sunshine by around 2 PM or so, don't be surprised if, like yesterday, some clouds hang around a few unlucky spots until nearly 5 PM. Temps will be about the same as yesterday with a run at 70 degrees coming if we can get enough sunshine. Southwest winds will not be that different than yesterday with the best chance for gusts over 10 mph coming whenever we get that big yellow orb in the sky to shine. Clouds are expected to cover the area in the overnight hours tonight with again that threat of patchy fog/mist towards dawn. Friday is expected to have a bit more sunshine and warmth with Saturday having even more. Lastly Sunday's trend remains in that same sunnier with more 70s direction as well.
