Today – Scattered showers will increase in coverage becoming a steadier light to moderate rain by late morning and continuing through the afternoon. Cannot rule out an isolated thunderstorm during the afternoon as well. Temperatures will likely remain in the upper 60s to low 70s today with a southerly breeze increasing to 10-15 mph for the afternoon.

| Winds (mph) | S→ENE 6-12 | NE 4-8 | SW 10-15 | WSW 6-12 |

Extended forecast – An approaching cold front will keep the chance for scattered showers and isolated thunderstorms in the forecast Friday with improving conditions expected as we get to the late afternoon. The front is forecasted to slip south of the area Saturday providing drier conditions before the front lifts back to the north Sunday. Saturday will be a dry day with partly sunny skies before more humid conditions return on Sunday. Isolated thunderstorms will be possible Sunday evening as the deeper moisture returns.
