

The Senior Open Forecast

6 AM Update

Friday, 28 July 2023

Synopsis -

At 0530 AM, skies were cloudy with some scattered areas of light rain and drizzle coming in off the sea with westerly winds blowing 10 - 15 MPH. I expect the light rain and drizzle to gradually fade away this morning as winds slowly increase to 15 - 20 MPH with gusts to 25 MPH by late afternoon for the west. A weak disturbance moves across the area overnight bringing some light rain with it that will linger into early Saturday morning but most of Saturday looks to be mainly windy with just a few spotty brief showers at times through the day. It looks like the next storm will come in on Sunday bringing more steady rain and very windy conditions to our area by afternoon.

Weather Forecast **Lightning Threat**
