

THURSDAY, JUNE 28th, 2023 - 5 AM U.S. Senior Open Weather Forecast

Any and all impact from the severe thunderstorm outbreak across Central WI overnight Wednesday remained north of Stevens Point allowing the smoke at the surface to remain through the morning expected to improve across the area Thursday afternoon as flow aloft continues its transition from the N/NE over to the W/SW this morning stopping the supply of smoke we have seen since late Sunday afternoon. The lack of moisture finding its way over SentryWorld will also act to keep things warmer and drier for the first round with temperatures this morning starting out in the mid 60s before quickly warming up as the sun does its best to break through the haze at the surface pushing afternoon temps into the mid 80s under partly cloudy skies. Southerly winds will remain fairly light as play begins this morning, then start to pick up in intensity as flow starts to transition over to the SW midmorning over to the W around noon before settling out of the NW late this afternoon as the last groups are making the turn holding that direction overnight Thursday through the end of play on Saturday limiting any chance for development of severe weather.
