Today – Some high-level clouds are expected to filter into the area through mid-day with partly cloudy skies present much of the afternoon. A potent system is beginning to take shape across western KS today and will gradually shift towards the course post-sunset today. A few light and spotty showers do have potential to roam the area later on near the end of play, but generally dry conditions should persist through sunset. S'ly winds will increase this afternoon alongside a few gusts above 20mph at times.

Monday – Scattered showers and storms are expected to be ongoing by the start of Mon as a system traverses across the region. A few storms could remain strong throughout the AM hours with gusty winds possible. Conditions will gradually slacken later into the day with isolated showers remaining plausible through the mid-afternoon timeframe. S'ly winds will gust near or above 20mph at times before weakening later into the day. Rainfall accumulations between 0.35"-0.70" are expected.
