Temp (min/max)	64/83	65/84	68/83	
Winds (mph)	W/SW 6-12 G18	SW 6-12 G18	W 7-13 G19	

Extended forecast – An additional disturbance is expected to traverse the region Sat but will be less intense than days prior. Still, scattered showers and isolated t-storms are possible through the mid-afternoon. A more potent shortwave will begin to enter the region in addition to a developing low/associated cold front later into the afternoon/evening Sun providing an increased threat for t-storm activity, some of which may be strong. This strong t-storm activity may continue overnight into Mon as the cold front pushes through the region will drying conditions forecast into mid-day Mon. Rainfall totals on the order of 0.40"-0.80" are expected Sat/Sun with locally higher totals possible within stronger cells.
