Today – Isolated showers are possible through the mid-morning hours with a low threat for a pop-up t-storm through 12PM. Conditions will further deteriorate beyond noon as the main forcing arrives, although the coverage of potential t-storm activity will vary across eastern TN through the PM. A scattered threat for t-storms is expected, with locally heavy rainfall and frequent lightning possible.

Extended forecast – An active pattern will remain into the weekend across our area with rounds of shower/storm potential each day. On/off activity is expected Fri PM with brief heavy rainfall potential within the strongest of cells. If cells manage to begin training throughout the area, rainfall totals may exceed the expected overall amount each day. Additional activity will develop in the area Sat but currently is forecast to remain a bit less scattered in coverage compared to today/Fri. By Sun, the strongest of disturbances will traverse into the TN valley and pose a threat for strong/severe storms through the mid-afternoon.
