Today – **Overnight rainfall: 1.40"**. A strong low-pressure system will track over Bermuda this morning with intermittent showers activity persisting much of the day. A T-storm can't be ruled out before 12pm. As this system moves away, very strong northwest winds are expected to develop after 12-1pm. Wind gusts of 35-45 mph will be possible much of the afternoon. Peak gusts near 50 mph could occur between 1-4pm. Forecast rainfall: Less than 0.25". **Sunrise: 6:50am / Sunset: 5:18pm**

Extended forecast – Strong low-pressure will shift to the northeast of Bermuda with brisk northwest winds continuing through Saturday night and Sunday. Wind gusts of 30-40 mph can be expected during this period. Conditions will also be favorable for passing showers, especially during the day Sunday. These showers could bring brief, squall-like conditions. The shower threat will diminish into Monday, although breezy winds will persist.

Forecast prepared by meteorologist Kyle Koval.
