Winds (mph)	S 5-10	S 10-15 G20	SSW 12-15 G25	SSW 15-20 G30	SSW 15-20 G32	SW 15-20 G32

Today – A few showers and isolated thunderstorms will be possible this morning before a lull in the precipitation is expected late into the mid-afternoon hours. It will become windy this afternoon with gusts to 30-35 mph at times as the remnant low-pressure system of Beryl moves towards Lake Erie. Additional showers will likely redevelop during the late afternoon into the evening as Beryl moves closer to NE Ohio.

Sunrise: 6:04am / Sunset: 9:00pm **Overnight rain: Trace** **Additional Rainfall: 0.10-0.20"**

Extended forecast – Showers may linger into Thursday morning before drier conditions return Thursday afternoon with partly cloudy skies. Mostly sunny to partly cloudy skies can be expected Friday into Saturday with highs in the mid to upper 80s each day. Cannot rule out an isolated shower or thunderstorm developing Friday afternoon. Otherwise, most locations will remain dry. A higher chance for scattered thunderstorms returns Sunday afternoon as upper-level energy approaches from the west.

Forecast prepared by meteorologist Stewart Williams.
