Today – A chilly start this morning with temperatures in the mid to upper 40s. Otherwise, sunny skies will gradually help warm temperatures into the upper 60s this afternoon. However, an NNE breeze of 10-15 mph will make it feel a little cooler at times. Partly cloudy skies will return during the afternoon into the evening as the wind flow switches from off the Atlantic. A few showers will be possible along the coast as well.

Monday forecast – An ENE wind flow will provide warmer temperatures with highs returning to the mid 70s. Scattered showers will become more numerous along the coast and some of these could push far enough inland into the Orlando area during the afternoon hours. Otherwise, most of the day should be dry with partly to mostly cloudy skies.
