## WEATHER FORECAST

Issued: 8am Saturday June 1, 2024

Time	9am	11am	1pm	3pm	5pm	7pm
Sky						
Weather	A Few Showers Poss.	Mostly Cloudy	Isolated Shower/T-storm	Isolated Shower/T-storm	Isolated Shower/T-storm	Partly Cloudy
Rain Probability	40%	10%	25%	30%	25%	10%
Lightning Probability	0%	0%	15%	20%	15%	0%
Temp (F)	66	73	77	80	79	77
Winds (mph)	Light & Variable	Variable 4-8	N/NW 5-10	N 6-12	N 6-12	N/NE 5-10

**Today** – A weak boundary will meander over the area today. Some showery activity is possible before 9:30am, otherwise partial clearing is expected to take place through the late morning hours. As daytime heating intensifies, the potential for shower/T-storm development exists between 1-5pm. This activity should remain spotty if it develops so only a 20-30% chance for showers/T-storms will be included in the forecast. Forecast rainfall: Less than 0.15". **Sunrise: 5:42am / Sunset: 8:42pm**

Day	Tonight	Sunday	Monday
Sky			
Weather	Partly Cloudy	Showers/T-storms Poss.	Scattered Showers & T-storms (Mainly Before 8am)
Rain Probability	0%	30%	60% (AM) → 20% (PM)
Rain Amount (in)	0.00"	< 0.25"	0.40-0.80"
Temp (min/max)	Min: 62	62/82	65/84
Winds (mph)	Becoming SE 4-8	SE 10-14 G24	S/SW 8-12 G18

**Extended Forecast** – Quiet conditions will be in place tonight with partly cloudy skies overhead. A 30% chance for showers/T-storms will be maintained in the Sunday forecast, since some model guidance tries to push a complex of showers/T-storms into Iowa. Given environmental conditions in place, this complex would likely be weakening or completely diminishes as it approaches Des Moines. A higher threat for showers/T-storms likely develops Sunday night into early Monday morning.

Forecast prepared by meteorologist Kyle Koval.
