7 AM Weather Update

Saturday, April 12, 2025

Synopsis: Temperatures are currently in the upper 40s and will gradually warm through the 50s as we head towards mid-day. Sunny skies will give way to partly cloudy skies by late morning with a mix of sun and clouds continuing through the afternoon. The air is much drier compared to yesterday and will help suppress shower development today. However, very cold air aloft may be able to squeeze out a rogue shower late afternoon into the early evening. After a cold start Sunday morning, sunny skies will help temperatures warm into the low 70s for the final round. Above normal temperatures quickly returns Monday with highs reaching the mid-80s with sunny skies.
