

FRIDAY, JUNE 13, 2025 – 5 AM WEATHER FORECAST

Temps only manage to drop into the mid 60s this morning and the current models show high temps climbing into the low to mid 80s by this afternoon. A few showers/sprinkles will be possible this morning as an area of low pressure pushing into the Ohio Valley brings high cloud cover and increased moisture into our area. Models currently indicate our best chances for heavier showers and potentially a thunderstorm will begin early in the afternoon and continue through evening. Winds will remain fairly light overall throughout today with gusts struggling to exceed 10 mph from a variety of directions. Overall the models continue to indicate that Saturday has the highest probability of seeing shower and thunderstorm activity as the area of low pressure continues to brush up against southwestern Pennsylvania. However, shower activity during the morning hours could limit thunderstorm development by keeping temperatures in the 70s. Uncertainty remains regarding shower and storm coverage for Sunday with the models struggling to get a handle on the timing and exact movement of the low pressure system.
