

THURSDAY, JUNE 12, 2025 – 5 AM WEATHER FORECAST

Temps only bottomed out in the low to mid 60s overnight and the models came in this morning saying we'll aim for the mid to upper 80s this afternoon under mainly sunny skies. High clouds will filter the sun more and more as the morning progresses with the sky becoming more whitish as we head into this afternoon before some lower level cumulus clouds bubble up later today. When they do develop, we'll introduce a 20% risk of a shower for Oakmont since the models limit the echoes on radar to our north halfway between Pittsburgh and Erie. Southwest flow today will be not as strong as the last few days with barely any gusts over 10 mph as speeds generally stay below 10 mph most, if not all, of today. The area of low pressure moving through the Mississippi Valley is still confounding the models for this weekend. Clouds appear to thicken on Friday with a shower or storm now possible in the morning, then more action could pop up in the afternoon depending on how warm we get since our humidity will be higher today and even higher on Friday. Showers with random areas of storms are trending more likely for the weekend, but stay tuned.
