

TUESDAY, JUNE 10, 2025 – 5 AM WEATHER FORECAST

We had luck on our side again yesterday and managed to get by with only recording 0.01" of rain in the bucket. This morning we will have some low clouds with a bit of haze to start the day, but it will quickly break up and leave us with periods of clouds and sun by midday trending towards a mostly sunny finish to the afternoon and heading into this evening. Winds will be a touch higher than yesterday with winds peaking mid afternoon at 7-14 mph with gusts around 20 mph possible. Dewpoints will trend lower this afternoon as well and should bottom out in the low 50s this afternoon. This, along with mostly clear skies, will allow temps to drop into the mid 50s overnight tonight. Temperatures and humidity will trend higher Wednesday and through the rest of the week with highs eventually topping out in the mid 80s by week's end. Rain/storm chances are starting to trend up as we head into the weekend and will need to be monitored closely in further updates.
