Today – Mostly sunny skies to start the day will give way to increasing clouds as we go through morning into the early afternoon as a weakening cold front approaches. As the front gets closer, the wind will increase late morning and peak to 15-20 gusting to 30 mph by early afternoon and continue this evening after the front passes. Isolated showers will be possible between 3pm-5pm as the front moves over the area. Rainfall amounts will be light and will likely average less than 0.05".
