| Winds (mph) | WSW 6-12 | WSW 10-15 | W 10-15 | W 10-15 | SW 6-12 | S 5-10 |

Today – Sunny skies this morning will give way to mostly cloudy skies during the afternoon as a thunderstorm complex over Wisconsin weakens and dissipates as it moves to the east. Cannot rule out an isolated shower or thunderstorm developing late in the day from the remnants from this complex, but most locations will remain dry. It will be warmer today with highs warming into the low 80s.

Sunrise: 5:52am / Sunset: 9:00pm **Summer officially begins at 10:42pm tonight!**

| Winds (mph) | SW 10-15 G20-25 | WSW 10-15 | W 6-12 |

Extended forecast – High pressure will continue to build into the region bringing the first heatwave of the season this weekend into early next week. Temperatures are forecast to warm into the upper 80s Saturday with low 90s expected on Sunday. Combine that with the humidity and the heat index will feel like 98F-101F Sunday afternoon. Hot and humid conditions will continue into early next week before the ridge of high pressure begins to break down.

Forecast prepared by meteorologist Stewart Williams.
